

GRESHAKE

WOOD MANUFACTORY & SAWMILL

Greshake Woodmanufactory offers you the commitment of a grown family business as well as the innovative power of two brothers who grew up with the material wood.

The handling of the natural material wood as well as the joy in the creation of beautiful furniture offer our customers a good basis for the fulfillment of their individual wishes.

In this brochure we present a small selection of the furniture that so far has already been well received by our customers. Through this approach we hope to initiate a dialogue with you.

We offer:

Solid wood tables
Unique pieces in limited edition
Extraordinary tables
Furnishing solutions

We are looking forward to your visit
Michael and Tobias Greshake

TREE TABLES

Our tree tables stand out due to their unique appearance. The tabletop is made from a single piece. The wood is neither glued nor artificially composed.

Each table is unique - structure and knot patterns are preserved. The edges of the table can be either straight sawn or natural. The latter option emphasizes individuality.

EPOXY RESIN TABLES

These tables made of natural solid wood planks are refined with inserts of resin. The properties of epoxy resin allow the use of different colors. This results in unique surfaces.

COFFEE TABLES

Coffee tables made of high quality woods are a perfect blend of craftsmanship and durability. Whether it's coffee tables in different sizes and shapes or side tables for your living room, you will always find the right table with us!

The wood of our coffee tables is oiled and available in different colors. The grain, as well as the annual rings are visible and thus provide an exclusive and authentic design.

REWOOD LINE

In our manufactory we create furniture inspired by the idea of circular value creation. The tables designed and manufactured in this line are mainly based on the recycling and reuse of wooden materials. In this way, our manufactory contributes to a value-preserving and resource-saving design of an environment that is committed to the future. This is practiced environmental and climate protection.
